www.clonleaf.com

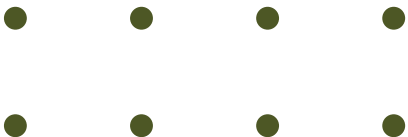

Founded in 2017, we set out with a clear mission: to make cannabis cultivation accessible to everyone. What began as a small initiative has grown into a thriving platform used by tens of thousands globally.

Our journey is defined by innovation, expertise, and a commitment to quality :

- Expert Team: Comprising horticulturists, technology specialists, and cannabis advocates passionate about simplifying cultivation.
- Global Reach: Serving over 50,000 users across five continents.
- Market Opportunity: The global cannabis market was valued at \$28.3 billion in 2023 and is projected to exceed \$90 billion by 2030, offering significant opportunities for new entrepreneurs.
- Advanced Facilities: State-of-the-art cultivation spaces that meet or exceed national and international guidelines.
- Safety & Quality: Rigorous processes ensuring safety, efficiency, and the highest quality in every stage of cultivation.
- Accessible Technology: Our platform allows users of all experience levels to grow cannabis virtually, simplifying complex processes with smart tools and guidance.
- Community & Support: A dedicated community and support system to guide users from novice to expert.

We continue to innovate, empowering entrepreneurs and hobbyists alike to enter the cannabis industry with confidence, knowledge, and resources.

ABOUT US

MISSION AND PHILOSOPHY

MISSION: Our mission is to help break the stigmas surrounding the cannabis industry, educate the general public about the many health benefits and usages of cannabis, and take the lead in Europe's ever changing and evolving grower landscape.

PHILOSOPHY: The health and autonomy of everyone are two of the most important pillars of our corporate philosophy. At Clonleaf, it is our goal to educate the public about the healing potential and medical benefits of cannabis. We also believe in working with our steadily growing global community to advance important milestones like the legalization of cannabis. Clonleaf is our way to offer you participation in the cannabis market and profitably secure your share of this unique, promising green future market at an early stage.

We take our promises seriously and stand up for the many sick people for whom medical cannabis is an effective, natural alternative WITHOUT the harmful side effects caused by many pharmaceutical drugs. We are also committed to supporting the many scientists and doctors who have been fighting for the recognition of the effectiveness and benefits of cannabis for years. Last but not least, our work is also committed to you. We believe people should have legal and socially acceptable access to cannabis products of all kinds. We believe that self determination and education go hand in hand.

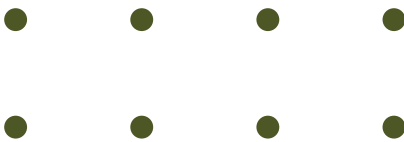

OUR IMPACT

*Empowering a Greener Future — **Clonleaf** champions sustainable cannabis cultivation through eco friendly innovations and socially responsible initiatives that nurture both the planet and our communities.*

At **Clonleaf Limited**, we are committed to promoting sustainable and responsible practices in the cannabis industry. By supporting projects that prioritize sustainability and social responsibility, we are helping to reduce the environmental impact of cannabis cultivation and to create positive social change in the communities where we operate.

One of the key ways that we do this is by investing in projects that use environmentally friendly growing methods and technologies. For example, many projects focus on using natural light or energy efficient LED lighting systems to reduce energy consumption, as well as implementing water saving techniques to reduce the amount of water needed for cultivation. By investing in these types of projects, we are helping to reduce the carbon footprint of the cannabis industry and to minimize the environmental impact of cultivation.

Hemp vs CBD vs THC in Food & Beverage

	HEMP		MARIJUANA	
	Seeds (Hearts)	Cannabidiol (CBD)	Flowers and Trim	Cannabidiol (CBD)
HOW CONSUMED	Whole or processed (hemp seed oil is common) in a variety of beverages and foods like granola, baked goods, burgers/hot dogs, and more. Topical products, too.	Chemical compound extracted from leaves and flowers and then eaten/drunk in oils, pills, edibles, etc. Topical products, too.	Whole, ground, or turned into a hash or concentrate, and then smoked, vaped, or eaten/drunk in pills, edibles, etc. Topical products, too.	Chemical compound found on the leaves and flowers. Can be consumed from smoking flower and trim whole, or extracted and infused into oils, medications, edibles, and topical products.
PHYSICAL EFFECTS	None, it is not psycho-active, but many consider it a health food because it is high in fiber, protein, and other vitamins and minerals.	None, it is not psycho-active. Some say there are medicinal and calming qualities. CBD from hemp is high in omegas, potassium, and magnesium and is often considered a health supplement.	Flowers and trim contain tetrahydrocannabinol (THC), the chemical compound that produces a euphoric buzz. Some say there are medicinal and calming qualities, too.	CBD on its own does not make you high (though some say there are medicinal and calming qualities). However, CBD from marijuana often contains THC (the compound that makes you high) because it comes from the same part of the plant.
LEGAL STATUS	Legal in all of the USA as long as there is less than .3% THC present.	CBD from hemp is legal to possess but not legal to add to food or topicals (as of January 2019).	Federally, marijuana is a schedule 1 drug. However, it is legal for medicinal use in 33 states and for recreational use in 10 states (as of January 2019).	In the states where marijuana and/or medical marijuana is legal, CBD products can be purchased pursuant to that state's laws.

Disclaimer: Food & Drink Resources (FDR) does not promote, condone, or advocate drug use. FDR cannot be held responsible for material on its website pages or pages we provide links to that promote illegal activities.

OUR SOLUTION

Our commitment to excellence is reflected in our EPA compliant facilities, strict quality standards, and a team of seasoned professionals dedicated to precision and care. Through cutting edge cultivation methods and strategic cost management, we ensure consistent, premium grade cannabis production. Every process from growth to delivery is optimized for efficiency, sustainability, and superior yield, setting a new benchmark in modern cannabis cultivation.

Top Facilities

Our state-of-the-art, EPA-compliant facilities are designed for optimal cannabis growth and production.

Strict Policy

We uphold rigorous quality control, environmental, and ethical standards.

Experienced Staff

Our team comprises licensed professionals with extensive industry experience.

Cutting-Edge Cultivation

Advanced cultivation techniques guarantee consistent, premium-quality cannabis.

Cost management

Strategic cost and production oversight ensures maximum efficiency and yield

WHY CLONLEAF MATTERS

GOOD EFFECTS/BENEFITS

ClonLeaf matters because it represents more than just innovation in cannabis cultivation; it stands for accessibility, quality, and trust in an evolving global industry. Founded on a vision to make cultivation simple and achievable for everyone, ClonLeaf bridges technology and horticultural expertise to empower individuals and entrepreneurs alike.

Our state of the art, EPA compliant facilities are meticulously designed for optimal cannabis growth, adhering to strict quality control, environmental, and ethical standards that ensure product safety and consistency. With a team of licensed, highly experienced professionals, we combine science, sustainability, and precision to produce superior results.

At ClonLeaf, innovation drives everything we do. Our cutting edge cultivation techniques utilize advanced automation, controlled environments, and data driven insights to deliver premium quality cannabis that meets international benchmarks. Through strategic cost and production management, we maximize efficiency and yield providing clients and partners with scalable, reliable solutions that align with market demand.

The benefits of ClonLeaf extend beyond cultivation. We offer users access to a trusted ecosystem that promotes transparency, sustainability, and long term growth. Whether you're an entrepreneur entering the market or an enthusiast looking to expand your knowledge, ClonLeaf provides the tools, community, and expertise to help you succeed. By merging innovation with integrity,

ClonLeaf continues to redefine how the world grows, manages, and experiences cannabis creating a sustainable future rooted in quality, efficiency, and care.

How the **Clonleaf** works?

ClonLeaf offers a seamless and transparent process that makes cannabis cultivation simple, rewarding, and fully managed by experts. It all begins with **Stage One** – Buy Plants, where clients can purchase any number of plants, each nurtured in our high tech, environmentally controlled grow rooms. Every client receives a personalized dashboard that allows real-time tracking of plant growth and health.

In **Stage Two** – Plant Growth, our team of professional growers takes complete care of your plants, ensuring ideal conditions for strong, healthy development. Clients can monitor progress 24/7 through live camera feeds, offering full visibility without any required labor or maintenance.

Once plants reach maturity in **Stage Three** – Plant Harvest, our experts handle the harvesting process from start to finish, guaranteeing premium quality results. Clients retain full control over how the harvested product is used or sold. Finally, in **Stage Four** – Payout, participants can either receive the harvested cannabis directly or sell it for profit, with running costs deducted and revenue shared 50/50 between **ClonLeaf** and the client.

Through this structured, technology driven process, **ClonLeaf** transforms cannabis cultivation into a fully managed, transparent, and profitable experience for growers of all levels.

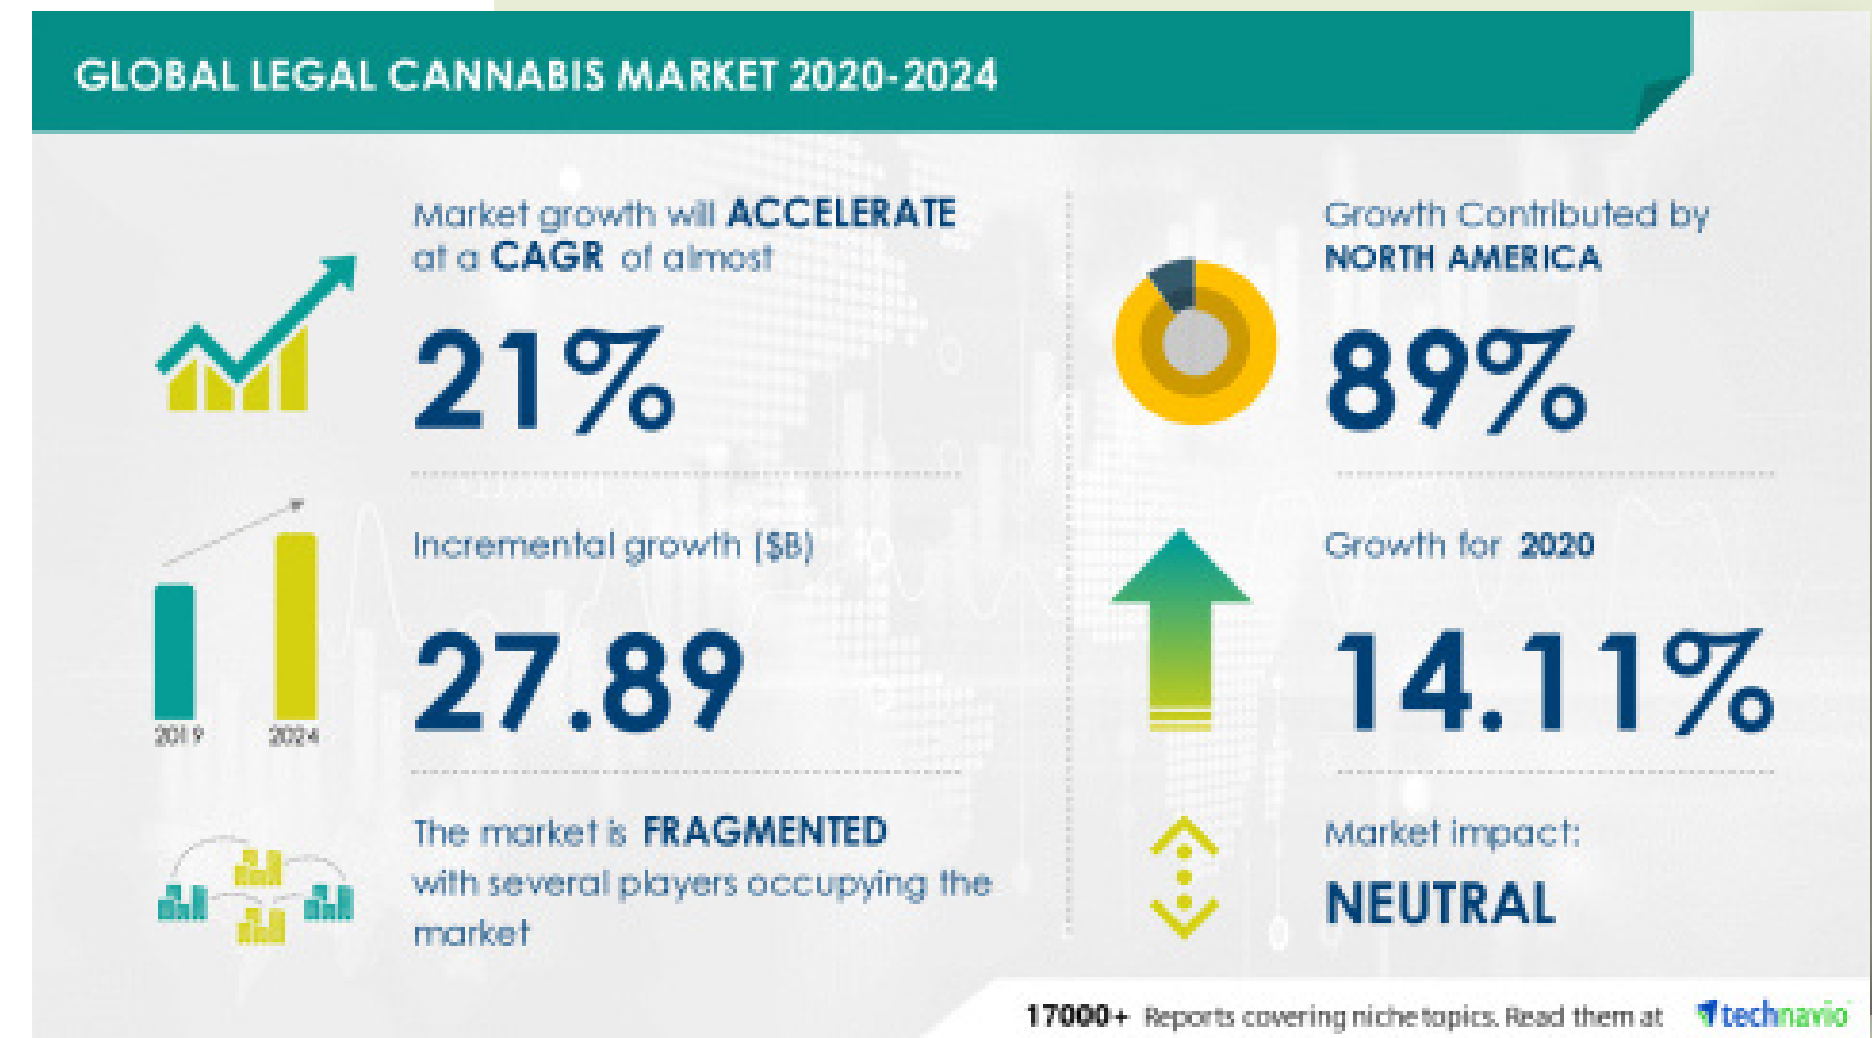

THE MARKET

With the cannabis market expected to exponentially increase before the end of the decade, the usual stigma that comes with the product is fading away at the same rate. One of the main reasons why this is so is because of the direct access to proper information that has helped change the orientation of users at large. A large percent of these new customers are the millennial. Not only are millennial the largest consumer group, but they're also well educated and know exactly what they want from cannabis. They trust peer recommendations and aren't very brand loyal; they'll try new, intriguing things whenever they want.

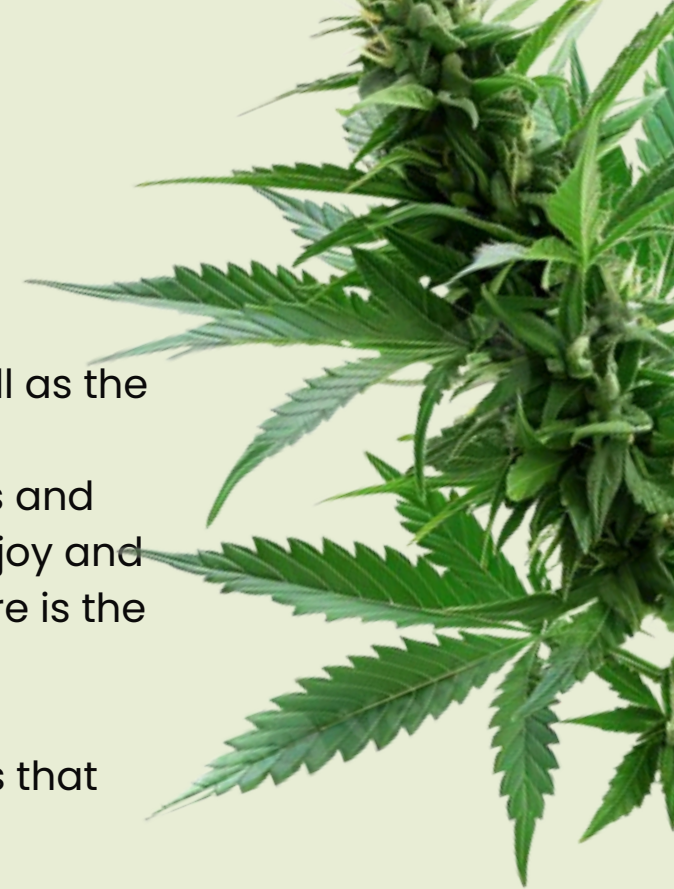

The global cannabis market has been increasing in adoption across territories of the world. After Uruguay set the pace by being the first to legalize the product, other countries in the American continents and some part of Europe has followed suit by legalizing their growth.

The worldwide cannabis industry was projected to be valued at USD 25,650.4 million in 2021, rising to USD 176,005.5 million by 2030, with a compound annual growth rate (CAGR) of 23.9 percent between 2021 and 2030.

The worldwide cannabis market is expected to develop due to reasons such as rising consumer knowledge of cannabis' health advantages and increasing medical applications. Our research shows that

EDUCATION

Clonleaf education includes a significant focus on regulatory compliance as well as the skills, information, and best practices needed to flourish in the cannabis market.

Clonleaf offers proper education that will provide customers with particular skills and information needed to make profitable investments in the cannabis industry, enjoy and preserve products. Due to the fact that the industry is growing exponentially, there is the importance of creating awareness through proper information and education.

Clonleaf will seek to expose users and partners to the multifaceted opportunities that the industry presents, as well as ways to legally handle cannabis through proper planting, preservation and distribution if possible (this is aside from the passive investments in the industry). Globally speaking, various platforms and organizations have created opportunities for average people to get certified college degrees and courses on the subject of cannabis.

Most people live in societies where cannabis is illegal. It was a significant shift when cannabis was legalized. How far have we come in shifting the public's perception of marijuana from an illegal and stigmatized substance to one that is lawful and socially beneficial?

Cannabis education has been inconsistent in different parts of the world. There is a paucity of evidence to support the optimal technique for cannabis awareness and education campaigns, which has traditionally relied on risk based arguments to convince people to "not use."

In this new legal climate, however, Clonleaf focuses on normalizing, or destigmatizing dispelling myths about cannabis usage and educating people on how to do it properly and safely. While this transition was not noted at the time of legalization, it has since become more apparent. One of the goals of our research team at Clonleaf is to discern the progress of the cannabis market especially after legalization in certain regions. Research shows that education is a major priority.

Why **Education?**

According to an international cannabis study, about 90% of cannabis users engage in higher-risk behavior, such as using high-potency products or vaping as the primary method of consumption, which is deemed high-risk due to its adverse effects on the respiratory system. Although every manner of ingestion carries dangers, vaping or edibles are preferred (for example, because edibles such as cannabis gummies work more slowly, there is a risk of eating too many while waiting for them to take effect).

Most regions have set aside significant money to boost public attention and educate people about cannabis as well as how to lawfully obtain and use it safely. In spite of this, most people still suffer from overdose.

Why **Education?**

Cannabis education has traditionally been aimed towards students, but adults must also be included as a core demographic. There are two issues with just addressing adolescents: youth are regarded as bad decision-makers, and adults such as teachers, health professionals, and law enforcement – lack the cannabis expertise to engage with youth.

Although cannabis use by minors is not promoted, it is critical that adults have the knowledge necessary to have informative and open minded talks with the youths. For educational purposes, teachers seem to be the key point of contact for youths. They won't be able to effectively interact with youth and give them the information necessary to make educated decisions if they aren't well-informed about our product.

Cannabis users should be informed of the norms and regulations in order to protect others' health and safety. Our preliminary findings revealed that without proper education, law enforcement agents may continue to regard cannabis as illegal, and society as a whole is still stigmatizing cannabis users.

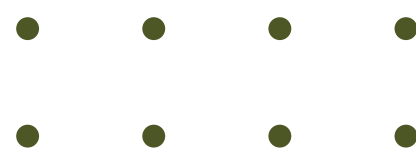

JOIN THE MOVEMENT!

Become a part of the campaign to promote cannabis farming that is environmentally and socially responsible. Through our crowdfunding platform, you can support Clonleaf's projects and make a difference by joining the growing movement for more ethical and ecological cannabis cultivation.

There are numerous ways to support Clonleaf and get involved. You can donate money to a particular project or sign up as a recurring supporter to support ongoing sustainability efforts. Additionally, you may spread the news about Clonleaf and nudge your loved ones to get involved. Together, we can build a more sustainable future for cannabis growing because every donation counts. Join us and help to solve the problem.

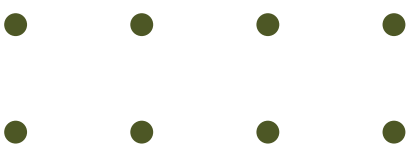

Partner with Us to Promote Sustainable and Responsible Cannabis Practices

At **ClonLeaf Limited**, we believe sustainability and responsibility are not just ideals they are essential foundations for the future of cannabis cultivation. By partnering with us, you join a movement dedicated to advancing eco conscious and ethical growing practices that protect the environment while ensuring long-term industry growth.

Our EPA compliant facilities utilize energy efficient systems, water recycling technologies, and organic cultivation methods to minimize environmental impact and reduce waste. We are deeply committed to responsible resource management, ensuring every step of the production cycle supports both the planet and the community.

Partners benefit from our expert guidance, transparent operations, and data driven cultivation technology, designed to optimize yield while maintaining integrity and compliance with national and international standards. Together, we can create a sustainable ecosystem that encourages innovation, promotes responsible consumption, and strengthens trust within the global cannabis market.

By collaborating with ClonLeaf, you're not just investing in premium cannabis cultivation you're contributing to a greener, more ethical future for the industry. Let's grow responsibly, protect our environment, and shape a sustainable legacy for generations to come.

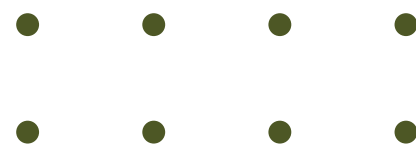

You Have Come to the Important:

You've arrived at the crucial moment where innovation, expertise, and opportunity converge to guide your success in cannabis cultivation.

Right Place Know:

You are in the right place to access expert guidance, cutting edge technology, and sustainable solutions for exceptional cannabis growth.

We're passionate about cultivating a sustainable future for cannabis.

Let's grow together.
